TECHNICAL BULLETIN – IPEX SYSTEM 1738 CERTIFIED PVC VENTING

Product Series: FTG, FTV, Lx, Lx-WH, Tft, TRX, Tx, Vmax

Models: All

Recent changes to the NFPA 54 and International Fuel Gas Code have introduced UL 1738 certified venting systems. System 1738 manufactured by IPEX is a UL 1738 certified PVC venting system that includes pipe, fittings, cement and terminations rated for flue temperatures up to and including 149°F. System 1738 is permitted for use with all NTI appliances where the appliance installation instructions currently approve the use of plumbing PVC. Please follow all venting guidelines provided in the applicable NTI Installation and Operation Manual.
