Art and Architecture

THE BATH AS ART®

More than producing vessels for the bathroom, MTI excels at creating works of art. Tubs and sinks become indispensable architectural elements that define a space. Thoughtful design that caters to the senses. Handcrafted quality that exudes luxury.

Why Specify MTI

THE REASONS ARE MANY

MTI Baths is a unique manufacturer that offers an expansive line of high-quality, innovative bath products: tubs, shower bases, sinks, Counter- and Vanity sinks in various materials. Here are some facts that contribute to our strong reputation and make us the preferred vendor for many clients.

INDUSTRY EXPERTISE

The MTI Projects Team is very active in the hospitality industry and is familiar with the brands and current design trends. Approved by virtually every hotel chain worldwide, MTI can assist in specification within certain standards requirements.

AWARD-WINNING DESIGNS

In the last two decades MTI has been recognized with well over 100 awards for design excellence and product innovation. Testimony to the MTI philosophy of design with purpose.

QUICK DELIVERY

MTI not only offers an incredible amount of customization but is remarkably able to do this while also having some of the fastest lead times in the industry. The factory is lean enough to provide attention to smaller jobs but large enough to manage orders by the truckload.

DESIGN STUDIO

MTI's in-house projects team is passionate about design and technically capable to assist with your product needs.

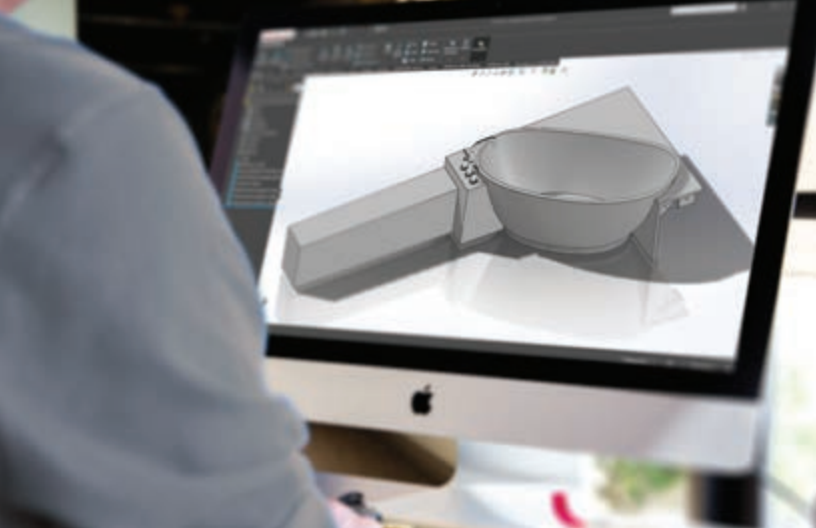

Contact the Design Studio for assistance in concept development, product selection, custom designs, budgeting, installations or whatever else you may need.

INSTALLATION SOLUTIONS

MTI offers engineering and installation assistance. Pre-leveling systems help to level and support shower pans or bath tubs.

Wall brackets for sinks can be designed to hit precise stud locations. Custom molds available to meet size or drain requirements for large remodels.

CUSTOMIZATION CAPABILITIES

MTI offers unparalleled flexibility and customization regarding design changes, hydrotherapy packages and the selection of options for increased comfort or easy installation. MTI will also build custom designs, whether client-developed or client-commissioned.

HANDCRAFTED IN THE USA

All MTI products are proudly made in the USA, using locally-sourced and Georgia-sourced materials whenever possible. As an employee-owned company, MTI exemplifies American ingenuity, quality and craftsmanship.

Selection of Materials

MTI offers a choice of materials to assist you in setting the right tone for your project and meeting your budget objectives. This flexibility will support your creativity.

MINERAL COMPOSITE

This material is made out of natural minerals mined locally in Georgia, bound together by a high-grade casting resin. The smooth, white glossy finish is provided by a high-performance polyresin coating specially formulated for MTI. This composite material allows for an upscale appearance at a more affordable price point.

SCULPTURESTONE®

This is Engineered Solid Stone®, a mixture of finely ground natural minerals and high-performance resins that are liquefied, poured and hardened. The result is molded stone that is 100% solid, with the same non-porous high-performance properties through and through. The finest on the market.

CROSS-LINKED ACRYLIC

MTI thermoforms American-made Lucite® continuous-cast cross-linked acrylic, which is the finest in the world for bath applications. The thick acrylic shell is uniform in thickness and consistent in color and property. This is reinforced with a substantial backing of fiberglass, resin and titanium.

Tubs

MTI baths are built at commercial quality levels to withstand high-traffic and meet the expectations of the most discerning homeowner or hotel guest. MTI baths all feature non-porous surfaces designed for simple cleaning and maintenance. All three materials have excellent thermal properties for bath water warmth retention, with Sculpture Stone being the highest. Below are features and benefits that differentiate these bath materials.

SCULPTURESTONE

- Feel the difference of the luxurious, velvety smooth matte finish.
- High-gloss upgrade can be achieved by hours of hand polishing for a deep shiny finish.
- Standard in white. Biscuit upgrade.
- Custom pigments, minerals and colored exteriors available for projects.
- Over 35 freestanding soaking tubs and air baths available.

MINERAL COMPOSITE

- Polyresin coating provides a smooth glossy finish. White only.
- Freestanding soaking tubs and air baths available.
- The latest material added to MTI tubs, with 5 models currently available, and more to follow.

CROSS-LINKED ACRYLIC

- Cross-linked acrylic has a high molecular weight which helps prevent flex and enables chemical resistance.
- The material consistency of continuous-cast acrylic allows minor surface scratches to be easily buffed out, and repairs are more easily color-matched than with competing materials.
- Acrylic molds are comparatively quick and economic to build, allowing for dimensional and drain location customizations that can help save time and expense in remodels.
- MTI incorporates a thicker backing than most acrylic tub brands which helps to prevent flex and also better retain warmth.
- Ideal hydrotherapies and sensory therapies and is available in 5 designer colors.
- MTI's acrylic baths are ideal for drop-in, undermount, alcove and freestanding installations. Over 200 models available.

Therapies for Wellness

MTI HYDROTHERAPIES: MTI OFFERS A LARGE ARRAY OF HYDROTHERAPY OPTIONS

High-performance. Hygienic. Quiet. Therapeutic.

MTI AIR BATHS

- Therapeutic bubbles. Air jets positioned on the tub floor produce millions of tiny bubbles to envelop the bather and offer a gentle massage.
- Clean and hygienic. Proprietary air jet housings prevent water from entering the air lines. Upon draining the bath water, an automatic purge cycle activates to remove any residual water. No additional housekeeping maintenance required.
- Universal option that is available on tubs manufactured in SculptureStone, mineral composite and acrylic.

MTI WHIRLPOOL

- Deep-tissue massage. Air and water combine for a personalized wellness experience with targeted jet nozzles and adjustable therapeutic pressure.
- Patented cleaning systems. Our whirlpool cleaning system quickly and thoroughly flushes water and air lines leaving the plumbing system clean and hygienic for the next guest. Financial savings via housekeeping time and water savings.
- Exclusive to acrylic. Available in drop-in, undermount and alcove tubs.
- Whirlpool and air bath hydrotherapy options can be combined for the ultimate experience for spas, suites and luxury homes.

MTI SENSORY THERAPIES: APPEALING TO THE SENSES OF SIGHT, SMELL AND TOUCH

Each of these therapies is naturally therapeutic, healing and beneficial.

CHROMATHERAPY

Color therapy. Adjustable, underwater lighting by digitally controlled LEDs provides health and balance to body and mind.

AROMATHERAPY

Therapeutic essential oils promote a multitude of physical and emotional wellness benefits when the air bath is operating.

THERMALTHERAPY

Heat soothes, quiets and relaxes both mind and body.

Sinks and Shower Bases

SINKS

MTI offers a variety of sink types, all manufactured in SculptureStone.

SculptureStone Sinks

- Select from vessel, semi-recessed and undermountable sinks in different designs and sizes.
- Counter-Sinks seamlessly integrate the sink bowl with the counter for a very clean look.
- Available in a variety of bowl sizes and shapes in both single bowl and double bowl configurations for both vanity-mount and wall-mount applications.
- Vanity Sinks likewise seamlessly integrate the sink bowl, with a selection of bowl styles and either parsons legs or waterfall sides.
- Material is 100% solid through and through.
- Organic look and feel.
- Solid material colors are white and biscuit.
- Non-porous, stain-, mold- and mildew resistant for easy housekeeping.

SHOWER BASES

MTI shower pans are available in two materials: SculptureStone and cross-linked acrylic.

SculptureStone Bases

- Features a concealed drain for clean appearance.
- Low-profile, multiple-threshold design allows specification of tile flange on 1, 2 or 3 sides.
- 100% solid through and through.
- Organic look and feel.
- Solid material colors are white and biscuit.
- The material is inherently slip-resistant.
- Non-porous, stain-, mold- and mildew resistant for easy maintenance.

Cross-Linked Acrylic Bases

- These bases are available as single traditional threshold design, as well as low-profile, multiple-threshold in a variety of sizes.
- Low-profile, multiple-threshold models are available with exposed or concealed drain, and can be specified with a tile flange on 1, 2 or 3 sides.
- Zero-barrier and seated bases are also available.
- Several designer colors are available.
- Acrylic is reinforced with a thick layer of fiberglass/resin/titanium backing for added strength and prevention of pan flexing.
- Textured bottom meets slip-resistance certification.
- Non-porous surface makes cleaning easy and minimizes maintenance.
